

EXEL

Winter 2021 - 2022

LEGACY

Exel brand was founded in 1960 by three chemists that began to manufacture electronic detonators for explosives. The name Exel drives from the company's origin, explosive electronics.

Composite products were introduced in 1970. Since, we have been one of the foremost Finnish sports equipment manufactures.

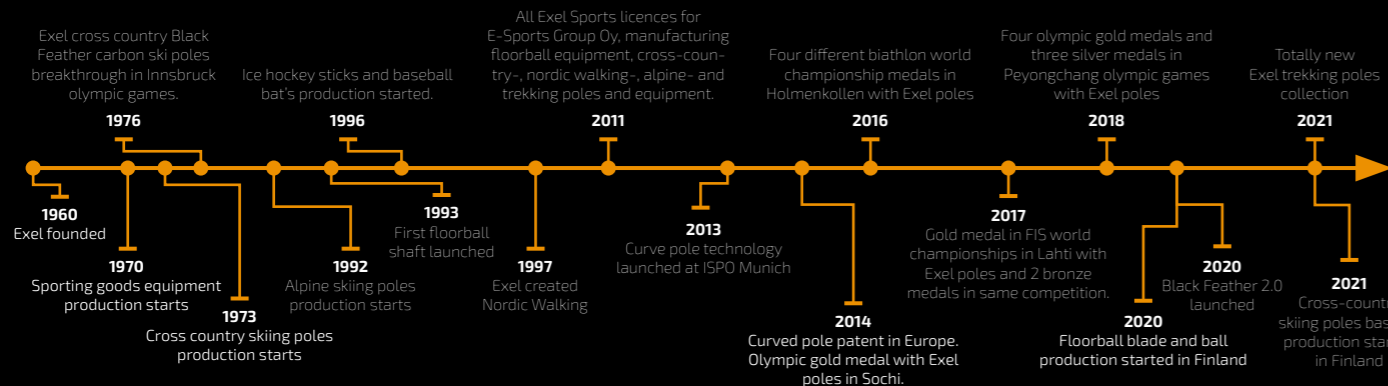

In 1973 we started the production of cross-country poles and 1976 Innsbruck olympic games were the breakthrough for Exel cross-country poles. The rest is golden history. To this day Exel is known for it's pioneering spirit that has led to innovations, shaping the sports as we know it.

TODAY

We combine innovative technology with functional design to create unparalleled line of products that keep contonually evolving to ensure uncompromised customer satisfaction in outdoor sports.

With over six decades of great heritage to build on, we are looking forward to building the future success of Exel with you by developing the best possible outdoor sporting equipments.

AVENGER2 QCB BASKET

Totally new **Quick Change Basket (QCB)** from EXEL which is made in FINLAND. Allows quick and easy exchange option of the basket for different track conditions.

EXEL QCB basket system includes two different winter baskets and roller tip. Suitable for 8,5mm and 10mm shafts.

Quick and easy basket change.

AVENGER 2
QCB Basket, 50 mm

AVENGER 2
QCB Basket, 65 mm

RACE GRIP

Designed and engineered together with world class athletes. Ergonomically designed narrow-shaped nordic pole grip for the best optimal control of the pole.

Special rubber added to the Race Grip's cork material makes it last much longer, meaning the grip does not wear out as easily as the regular grips do. Race Grip is designed to fit into 17mm top end shafts.

QC GRIP

Quick-Click Grip based on Race Grip. Just pull the top part up and press the button inward while pushing the strap to the grip.

Special rubber added to the QC Grip's cork material makes it last much longer, meaning the grip does not wear out as easily as the regular grips do. QC Grip is designed to fit into 17mm top end shafts.

FUSION2 QC & FUSION2 STRAPS

Updated versions of our popular Fusion straps. New materials are softer, but at the same time stronger, making the Fusion2 straps now even more comfortable to use. Updated velcro material.

Normal plastic buggle in the strap side is removed and tightening part is added to the strap frame to remove any hard spots inside the straps.

Cross-country poles

We are proud to present you our new cross-country skiing poles collection. Season 21-22 collection is offering a lot of new innovations and pole models with a piece of history and heritage.

Poles and components are designed together with world leading athletes to meet their requirements for ski poles. Whatever you need to enhance your cross-country experience, you will find the best possible equipment and tools in this collection.

WORLD CUP
ULTRA LITE

BLACK FEATHER 2.0

Racing line

Exel Racing Line poles are developed in co-work with world class athletes to meet the highest standards. Excellent stiffness, pendulum and balance of the shaft plus numerous tweaks and innovative improvements make the poles in this line perfect for any athlete.

ULTRA^{LITE}

Probably the lightest ski pole in the world.

If you are looking for extremely light ski poles with great stiffness and perfect pendulum, this is your choice.

Ultralite is using lightweight UHM carbon shaft and together with totally new Avenger2 QCB basket system it's giving perfect pendulum to the poles.

Race grip is offering great control over the pole and Fusion2 straps maximize the power transmission.
