ON THE TRAIL OF THE GLACIERS

Exploring the past for a sustainable future.

Ferrino has chosen to dedicate this catalogue to the project **"On the trail of the glaciers"**. The impressive photographic comparisons cannot leave us indifferent, and they remind us of the urgency to act with respect for the environment. The archive photographs take us back to the historic roots of our company, which has always favoured a respectful and conscious use of our mountains.

"On the trail of the glaciers" is a photographic-scientific project that combines photographic comparison and scientific research in order to disseminate the effects of climate change through the observation of changes in glacial masses over the last 150 years.

With 6 expeditions in 10 years to the most important mountain glaciers on Earth (Karakorum 2009, Caucasus 2011, Alaska 2013, Andes 2016, Himalayas 2018, Alps 2020), the project aims at supporting original studies and to realize new photographic shots from the same observation points and in the same period of the year of those made by photographers-explorers of the late 1800s and early 1900s.

The project represents the largest existing archive of comparative photography on variations of glacial masses; it was conceived and realized by the photographer Fabiano Ventura in collaboration with a technical-creative staff and is supported by an international Scientific Committee.

The strong communicative power of photographic comparisons, together with the results of scientific research, represents a contribution to the development of a greater awareness about the impact of human activities on climate. The dissemination of the project contents aims at raising public awareness of the need to safeguard natural resources for the protection of future generations.

Fabiano, let's start from the beginning. What is Repeat Photography?

It is a photography technique, that is commonly used by glaciologists. I wanted to add to this method of researching the exact geographical shooting point, in addition to an in-depth study of the plates and lenses used by early photographers. By reproducing the same instrumentation, it is possible to obtain the same distortions and therefore a point-by-point superimposition of the actual image with the historical one.

What were the main observations from the photographic comparison in the Alps?

There has been a significant loss of glacial mass, especially of the fronts. Big retreats and real collapses. I was already expecting this after having been in the Caucasus, a very similar mountain range. On both, there are valley glaciers that also reach low altitudes, where the effects of global warming have been felt over the years. What were once glacial valleys are now areas of debris where larches and shrubs grow.

Ph Fabiano Ventura 2020 - © Associazione Macromicro - onthetrailoftheglaciers.com

Ph Dario Orlandi 2020 - © Associazione Macromicro - onthetrailoftheglaciers.com

In these last alpine stages Fabiano was followed by Riccardo Scotti, glaciologist of the Lombardy Glaciological Service, who already in the past had the pleasure of being part of the "On the trail of the glaciers" team during expeditions to the Caucasus and Alaska. Scotti, from Valtellina, has been studying Alpine glaciers for many years and can help us to better understand the scientific significance of the shots taken by Ventura.

Riccardo, what is happening to the Earth's glaciers?

We can say that practically all of them are in crisis. The regions where mountain glaciers are suffering most from the consequences of climate change are the southern Andes, Alaska and the Caucasus. Moreover, this phenomenon has accelerated dramatically since the 1990s, when we began to observe a much more significant rise in temperatures than before. One of the most obvious findings from the photographic comparison is that glaciers have started to recede six times faster than in the 20th century.

But what about in the Alps?

Since the end of the Little Ice Age, when industrialisation started, we have lost about 65% of ice volume. Here, too, we have a very strong retreat. Some of the smaller glaciers have already disappeared. We have also observed that the hot summers are not only revolutionising the glaciers, but they are changing the appearance of the big mountains. We have peaks over 3,000 metres that should be permanently snow-covered but are now mudflows in the summer.

What could be the future consequences if the trend is not reversed?

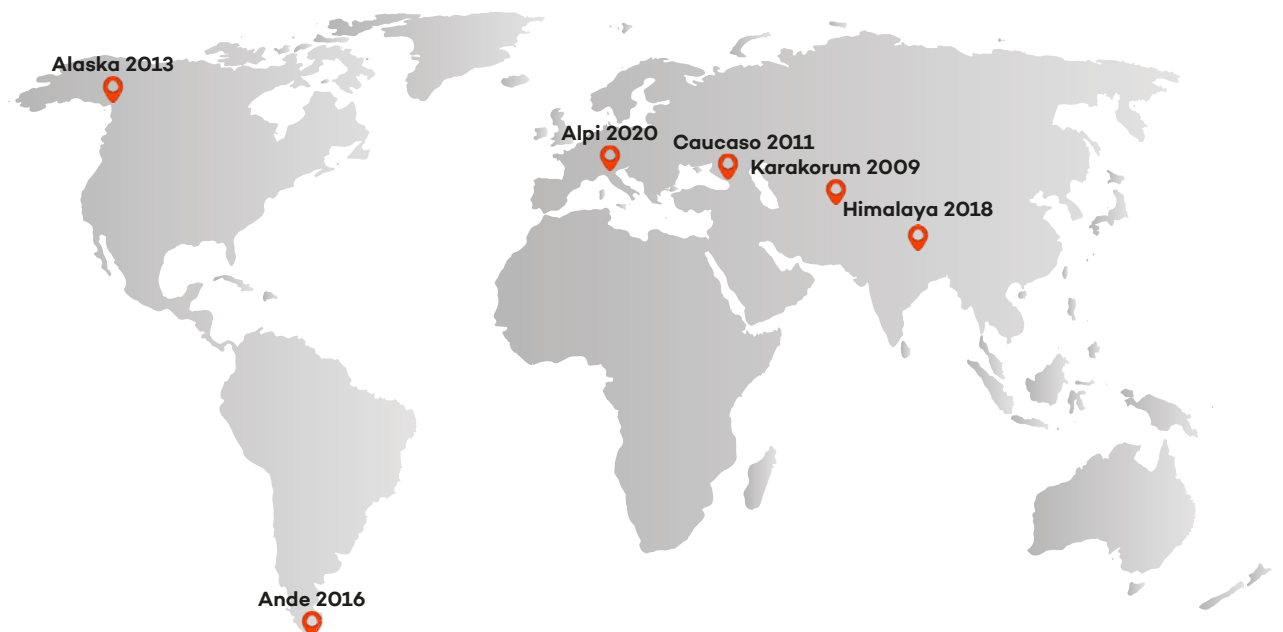

The consequences vary depending on the location of the glaciers and their size. Alpine glaciers, which are among the worst off in the world, count for little in the calculations of ocean rise, but they certainly have a major impact on the territory as one of the most densely populated areas of the planet. The glaciers of the Himalayas are a fundamental resource for the great rivers of Asia, essential for the survival of the people who live there.

In recent years, Alaskan glaciers have made a significant contribution to the rising oceans. Antarctica and Greenland, on the other hand, may have dramatic global effects on ocean rise. Not surprisingly, glaciological research in recent years has been focusing on the western Antarctic ice sheet.

What can we do, and more importantly who can do something, to solve or slow down the phenomenon?

The only possible mechanism for preserving glaciers is climate action. We need to reduce climate-changing gas emissions quickly. I am sorry to say this, but tarpaulins and other technological solutions can only work on a small scale, not on a global scale.

A change of course requires a commitment from all actors involved, from individual to large-scale initiatives. There has to be a combination of awareness-raising and political activity aimed at reducing emissions.

High Lab

Ultimate 38

Ultimate 38 is ideal mountaineering backpack. 100% waterproof thanks to HDry® system. (10.000 mm water column, even on the seams).

Instinct 30 + 5

Mountaineering backpack made in Dyneema® Composite Fabric, Cordura® Nylon with SuperFabric® reinforcements to guarantee an excellent combination of light weight and strength.

Instinct 65 + 15

Mountaineering backpack in Dyneema® Composite Fabric, Cordura® Nylon with SuperFabric® reinforcements to guarantee an excellent combination of light weight and resistance.

Back Systems

Breathable Back

Ultra-breathable back, shoulder straps or waist belt using open-cell padding with super-breathable mesh fabric.

Hollow Back System

Ultra-breathable back, shoulder straps and waist belt with a combination of pre-formed padding with vent channels and super-breathable mesh fabric.

Air Convector Tech

A super-breathable ergonomic back in mesh fabric. The double-density shaped padding ensures excellent breathability. The back panel is supported by a removable polyethylene panel with internal support for improved load distribution and carrying stability.

Double Ergo Adjustment

An extremely practical and comfortable adjustment system using a shoulder strap slide that runs along a self-modelling double framework in aluminium for better weight distribution in the waist area.

Dry Net System

Breathability is guaranteed by mesh fabric, while weight distribution and carrying stability are optimised by a framework.

XL 50/54 CM | L 45/49 CM | M 40/44 CM | S 35/39 cm

Fabrics

Twill 500 x 400D

Fabric made in polyester with excellent strength and resistance.

Dyneema®

Ultra-light fabric in high-tenacity DSM Dyneema® fibre.

Dyneema® Composit

Dyneema® Composite is a patented, ultra-lightweight fabric made of flexible non-woven composite laminates which are reinforced with Dyneema® fibers. The variant of DCF selected by Ferrino is a 2-layer laminate material using 143 oz/yd 2 DCF and a 50D polyester plain-weave fabric: high tear and tensile strength and an unmatched strength/weight ratio.

Double Diamond Cordura®

Exceptionally robust fabric made with high-tenacity 210D polyamide fibre.

305P Ripstop HP Cordura®

HP (high performance) 305D polyester fibre Ripstop fabric.

Supertex®

An extremely hardwearing fabric that is ideal for backpacks that have to withstand repeated stresses over time.

Superfabric®

This fast-drying fabric also offers exceptional performance in terms of abrasion and shear resistance.

Reinforced Laminated Fabric

Rip- and scratchproof chlorosulphonated polyethylene.

Nylon 50D Dot Dobby Ristop

An ultra-light fabric that guarantees excellent resistance to breaking and tearing, thanks to its Ripstop weave.

Hdry®

The Hdry® waterproofing technology is based on a patented lamination technique, where, thanks to the combined action of pressure and temperature, the waterproof membrane is heat welded inside the backpack.

With the Hdry® system, the membrane is prepared in a 3D shape that, by adapting to the shape of the backpack, adheres to the inner surface, perfectly sealing the seams and any other point where water can enter. This process makes the backpack completely waterproof (10.000 mm water column, even at the seams), and increases the resistance of fabrics guaranteeing improved durability.

Tripleseam

Fabrics are joined together using a double overlapping seam, protected by nylon edging, which is in turn secured by a third seam.

Hiking

Finisterre 40 Lady

Finisterre is Ferrino's iconic hiking backpack. The materials have been completely renewed and so has the equipment, to give hikers an even better walking and travel experience.

Finisterre 38

Back with "Dry Net System": a carrier frame in flexible steel, not only guarantees perfect load distribution but also serves to tension the mesh that separates the backpack from the wearer's back for excellent breathability.

Agile 25

Agile 35 has been specially designed for lite backpacking: essential look, technical details and the new "Hollow back system" make it the best choice for those who are looking for lightness and high performances.

Agile 33 Lady

Designed to fit the female body, the shape and construction of the shoulder straps and waist belt are ergonomically ideal for women.

Back Systems

Hollow Back System

Ultra-breathable back, shoulder straps and waist belt with a combination of pre-formed padding with vent channels and super-breathable mesh fabric.

Dry Net System

Breathability is guaranteed by mesh fabric, while weight distribution and carrying stability are optimised by a framework.

Woman Special Features

We pay a great deal of attention to the different needs of outdoor enthusiasts and that is why we have created our WOMAN line, a range that includes backpacks and sleeping bags especially designed to meet the specific requirements of women users, guaranteeing high performance and maximum comfort.

Fabrics

420D Honeycomb

High-tenacity fabric made in polyester fibre that, thanks to the Honeycomb weave, has exceptional strength and resistance.

Jacquard Weave 500D

Ultra-light fabric in high-tenacity DSM Dyneema® fibre.

210D HD Invisible Ripstop

Extremely tough polyester fiber fabric being exceptionally resistant due to its ripstop weave

Supertex®

An extremely hardwearing fabric that is ideal for backpacks that have to withstand repeated stresses over time.

Reinforced Laminated Fabric

Rip- and scratchproof chlorosulphonated polyethylene.

Triple seams

Fabrics are joined together using a double overlapping seam, protected by nylon edging, which is in turn secured by a third seam.

Recycled Fabric

You are buying a product made from 100% recycled, GRS-certified fabric.

Global Recycled Standard “GRS” is an international certification promoted by the Textile Exchange with the aim of encouraging the use of recycled materials in the textile industry.

GRS stands for:

- **Clear information about the characteristics of the recycled raw material.**
- **Standards that can guarantee ethical working conditions.**
- **Rules to reduce environmental impacts and harmful chemicals to a minimum.**

Ferrino has adopted this certification, acknowledging the vital importance of a sustainable production and consumption model. In this way we are providing our contribution by reducing consumption of resources (virgin raw material water & energy used in production) yet maintaining a specific standard when transitioning to such fabrics.

Active

X-Rush vest

The maximum when it comes to basic style combined with comfort and stability. Perfect for trail running. Available in 3 sizes to guarantee a perfect fit.

Steep 20

Backpack built for running, mountain biking and hiking. Steep 20 is designed for the more discerning user, who needs a fully equipped but extremely lightweight backpack.

Zephyr 17+3

Zephyr 17+3 is a 17-litre extending backpack (+3). It is multipurpose and multisport, designed with great attention to detail and equipment, making it ideal for running, mountain biking or trekking / hiking.

Back Systems

Breathable Back

Ultra-breathable back, shoulder straps and waist belt using open-cell padding with super-breathable mesh fabric

Hollow Back System

Ultra-breathable back, shoulder straps and waist belt with a combination of pre-formed padding with vent channels and super-breathable mesh fabric.

Dry Net System

Breathability is guaranteed by mesh fabric, while weight distribution and carrying stability are optimised by a framework.

Fabrics

Dyneema®

Ultra-light fabric in high-tenacity DSM Dyneema® fibre.

Nylon 50D Dot Dobby Ripstop

An ultra-light fabric that guarantees excellent resistance to breaking and tearing, thanks to its Ripstop weave.

210D HD Invisible Ripstop

Extremely tough polyester fiber fabric being exceptionally resistant due to its ripstop weave

Diamond HD

210D polyester fibre fabric with high-density weave and an excellent weight/robustness ratio.

Nylon 40D

Reinforced Laminated Fabric

Rip- and scratchproof chlorosulphonated polyethylene.

Triple seams

Fabrics are joined together using a double overlapping seam, protected by nylon edging, which is in turn secured by a third seam.

YKK zips

Recycled Fabric

You are buying a product made from 100% recycled, GRS-certified fabric.

Global Recycled Standard "GRS" is an international certification promoted by the Textile Exchange with the aim of encouraging the use of recycled materials in the textile industry.

GRS stands for:

- **Clear information about the characteristics of the recycled raw material.**
- **Standards that can guarantee ethical working conditions.**
- **Rules to reduce environmental impacts and harmful chemicals to a minimum.**

Ferrino has adopted this certification, acknowledging the vital importance of a sustainable production and consumption model. In this way we are providing our contribution by reducing consumption of resources (virgin raw material water & energy used in production) yet maintaining a specific standard when transitioning to such fabrics.

Tents

Maverick

Maverick 2 is the compact, ultralight 2 person tent with single wall and waterproof and breathable membrane.

Trivor 2

All-season tent with external pole system that makes fast set-up possible without getting the room wet, even in harsh weather conditions.

Lightent 2 Pro

Lightent 2 Pro is an ultralight, compact tent designed to shelter trekkers, hikers and cycle tourists. The system of external poles allows quick and easy set-up, even in harsh weather conditions, and without getting the inner tent wet.

Atacama 3

Atacama 3 is a 3-season tent for hiking and trekking in autumn / spring / summer, and is also suited to mountain use. Designed for 3 people, it has a large adjustable front veranda, excellent ventilation and a large range of accessories.

Fenix

Family camping tent designed for 5 people. Complete with large front vestibule to make it ideal for holiday camping. To add to the living space, the tent can fit the 5-place canopy (Art. 91221LDD).

P. 114

Tent Set

Tent Set is the innovative modular system that allows every customer to create a tent that is fully adaptable to his needs. It is possible to buy a basic configuration and add all the necessary components in order to make the outdoor experience even more unique and varied, without purchasing a new tent.

An ode to efficiency, which reflects the fundamental value of Ferrino's policy - to offer its customers a product that lasts over time - and the company's commitment to sustainability. The Tent Set system makes it possible to combine several tents into one, reducing - for the same function - consumption of resources, waste of material and general garbage produced.

P. 126

HighLab

High Lab tents represent the height of Ferrino research and technology. They are the result of tests performed in a laboratory and at high altitudes for the purpose of supplying prompt and leading-edge solutions to professional users who need to face extreme conditions in terms of the elements and the environment.

P. 138

4 Seasons

This is a range designed with attention to even the smallest details and suitable for mountain use. Made using the best materials available, the range has all of the characteristics that make Ferrino quality tents stand out from the rest: resistance to the elements, excellent design, functionality, light weight and fast set-up and taking down.

P. 146

Lite

Extremely light tents, compact and with a fast set-up. Perfect for itinerant trips.

P. 162

3 Seasons

A range devised for use in milder weather conditions. Special care has been taken to achieve the maximum in terms of ventilation and easy set-up.

P. 174

Family

Large tents designed for those who need a lot of space for comfortable camping over longer periods. Made to guarantee hardwearing strength, good wind resistance and excellent ventilation.

ALL
YOU
NEED
IS
LESS*

*Yes, it's tentset

Our focus on the environment has allowed us to create a new concept in tents: **Tent-Set**.

Using our **modular** composition system, it is possible to design your own versatile tent that will suit your needs, combining and replacing various elements, which then **cuts** consumption of **resources** and **waste**.

Thousands of possible choices in just six steps

Create your customised tent in six simple steps

1

People

How many people is your tent for?

Inside

More mosquito net for summer use or
more insulation for the winter?

2

3

Poles

Fibreglass or aluminium poles?

4

Fly-sheet

Summer or winter holidays?

Pegs and accessories

A place for everything and everything in its place: we've got an accessory for all your needs

5

6

Customisation options

With the online configurator, you can customise your fly-sheet with logos, graphics or even your favourite photo.

We leave room for your imagination

Have fun customising your tent with lettering and graphics!

One of our graphics

Choose the graphic design that best suits your interests from our illustration library.

Your favourite photo

Give a special touch to your tent - print out your favourite photo!

Your motto

Your favourite saying, with you always!

Your logo

Do you already have your own personal logo? Fantastic! You really ought to put it on **your** tent!!

Features

Triple Reinforcement

3 layer construction floor corners reinforcement.

R.B.System

Fly sheet reinforcement system in Oxford 210 D polyester fabric. Works like an harness, to provide higher wind/storm resistance.

Liftable Flap

To get the tent adjusted according to the weather conditions – to get it more closed or open either for a better ventilation or to protect the inner tent in case of bad weather conditions.

Fire Retardant

Fire retardant fabrics comply to the specifications of the CPAI-84 standard.

Tape Adjustment

To attach and regulate the distance of the fly-sheet to the base.

Poles

Tempered 7001 T6 aluminium alloy poles with exceptional characteristics of lightness, resistance and elasticity

Floor Corner

To fix the tent to snow with ice-axes, skis or other moorings.

Poles-guy Line

Guy lines connected to the poles through the external ventilations sleeves, for a higher stability.

Pegs

All pegs High Lab line are made of aluminium.

Maverick 2

99067 DAA

* fly sheet and poles only

Maverick 2 is the compact, ultralight 2 person tent with single wall and waterproof and breathable membrane. It is the result of laboratory and highaltitude testing and is a great, technologically advanced answer to the problems of professional users needing to deal with extreme conditions.

Structure: Double cross

Materials: Fly sheet in 40D, weight 80 g/m², polyamide Ripstop with Texit® membrane 10000 mm and Teflon™ Shield+ finishing material to form a barrier around each single fibre. Liquid splashes will simply form beads and roll off, while all residues can be removed by brushing or wiping with a clean cloth. Excellent repellence for both water and oily splashes. | Floor in 70D, weight 95 g/m², polyamide, coated with polyurethane, waterproof

to 8.000 mm | Transparent front window in TPU | Taped seams to guarantee total waterproofing | Three layer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 2 shockcorded aluminium poles of equal length for easier set up | External poles | "V shape" aluminium pegs

Entrance and ventilation: Front vestibule | Front door with exterior mosquito net | Ventilation sleeves and outlets that close from the inside

Storage: Inside pockets | Gear loops

Accessories: Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings. | Storm guy lines | Fluorescent guy line pulls | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code

Snowbound 2

99098 DAFR

Snowbound 2 is the 2 person tent built to provide top performance when it comes to wind resistance, thanks to a system of reinforcements on the perimeter structure (RB) and to its geodesic shape. This tent is the ideal shelter for professionals facing expeditions at high altitudes or on glaciers, in base camps or areas with lots of exposure to wind and extreme weather conditions

Structure: Geodetic

Materials: Fly sheet in 50D, 80 g/m², Polyester Ripstop coated with polyurethane, waterproof to 4.000 mm. Water repellent, with FR treatment | R.B. System: fly sheet with reinforcement band on the perimeter in 210D polyester Oxford that acts as a harness for guaranteed better resistance in case of adverse weather conditions | Inside waterrepellent and breathable 70D, 55 g/m², Polyester Ripstop, with FR treatment | Floor in 70D, 95 g/m², Polyester coated with polyurethane, waterproof to 8.000 mm. Water repellent, with FR treatment | Transparent front window in TPU | Taped seams to guarantee total waterproofing | Threelayer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 4 shockcorded aluminium poles of equal length for easier set up | 1 aluminium veranda pole in a different colour | Inner tent overhung using continuous mesh sleeves | "V" shape" aluminium pegs

Entrance and ventilation: 1 vestibule and rear entrance | Fully opening room doors that fold into a special pocket | Ventilation sleeves that can be closed from the inside | Liftable flap on the entrance to the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

Storage: Internal storage pockets | Gear loops

Accessories: Adjustable fly sheet distance from the base, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Guy lines to secure the tent connected directly to the poles for maximum stability | Fluorescent guy line pulls | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code | Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings.

Entrance and ventilation: 2 vestibules | Fully opening room doors that fold into a special pocket | Ventilation sleeves and outlets that close from the inside | Liftable flap on the entrance to the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

Storage: Internal storage pockets | Gear loops

Accessories: Adjustable fly sheet distance from the base, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Guy lines to secure the tent connected directly to the poles for maximum stability | Fluorescent guy line pulls | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code | Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings.

Pilier 2

99068 LAAFR

* fly sheet, inner tent and poles only

Pilier 2 is the perfect tent for use at high altitudes with maximum performance in terms of wind resistance. The system of external poles means that set-up is quick in cases of bad weather and prevents the inner tent from getting wet.

Structure: Geodetic

Materials: Fly sheet in 50D Polyester Ripstop, 80 g/m², with polyurethane coating, waterproof to 4000 mm. Water repellent and FR treated. | Inner tent Water-repellent and breathable 70D Polyester Ripstop, 55 g/m², with FR treatment. | Floor 70D, 95 g/m² polyester, coated with polyurethane, waterproof to 8,000 mm, water repellent and FR treated | Clear window in TPU | Taped seams to guarantee total waterproofing | Three-layer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 3 poles in shock-corded aluminium in different co-

lours for easier set up | Inner tent hung from the fly-sheet using elastic tapes, rings and toggles | "V shape" aluminium pegs

Entrance and ventilation: Front vestibule | Room door with mosquito net exterior that opens out fully and folds into a special pocket | Ventilation sleeves that can be closed from the inside

Storage: Internal storage pockets and loops | "Ambient light" light diffuser pockets | Removable storage on the ridge, inside the tent

Accessories: System to fasten the fly-sheet to the inner tent with aluminium buckles for optimum tensioning between the two parts. | Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings. | Multipoint guy line system to prevent the breakage or deformation of poles in strong winds | Fluorescent guy line pulls | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code

Pilier 3

91163 LAAFR

* fly sheet, inner tent and poles only

Pilier 3 is a 3 person tent built to withstand the harsh climate conditions at high altitude

Structure: Geodetic

Materials: Fly sheet in 50D, 80 g/m², Polyester Ripstop coated with polyurethane, waterproof to 4.000 mm. Water repellent, with FR treatment | Inside waterrepellent and breathable 70D Polyester Ripstop, with FR treatment | Floor in 70D, 55 g/m², Polyester coated with polyurethane, waterproof to 8.000 mm. Water repellent, with FR treatment | Transparent front window in TPU | Taped seams to guarantee total waterproofing | Three layer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 3 poles in shockcorded aluminium in different co-

lours for easier set up | Inner tent hung from poles with continuous mesh sleeves | "V shape" aluminium pegs

Entrance and ventilation: Front vestibule that rolls up fully | Rear vestibule | Room door with mosquito net exterior that opens out fully and folds into a special pocket | Ventilation sleeves that can be closed from the inside

Accessories: Adjustable fly sheet distance from the base, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings. | Storm guy lines | Fluorescent guy line pulls | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code

NEW

Campo Base

90130 LAA

Campo Base is an extremely versatile expedition tent that is perfect as a base camp, mess tent, or as a support for logistics. The removable inner tent means it is also perfect for sleeping quarters.

Structure: Geodetic

Materials: Fly sheet in thermal insulating, aluminised 210D Polyester Oxford, waterproof to 4,000 mm, water resistant, fireproof to CPAI 84 standard | Inner tent in water-repellent, breathable 70D Polyester, fireproof to CPAI 84 standard | Fully welded inner tent floor in Polyethylene, waterproof to 10,000 mm, water resistant and fireproof to CPAI 84 standard | Fully welded additional floor in Polyethylene, waterproof to 10,000 mm, water resistant and fireproof to CPAI 84 standard | Taped seams in the fly-sheet to guarantee total waterproofing

Poles: Poles in 7001 T6 tempered aluminium alloy for light weight, strength and elasticity | 4 shock-corded aluminium poles, diameter 13 mm, all the same length for easier setup | 2 inner tent ridge poles in shock-corded aluminium, diameter 8.5 mm

and the same length for easier setup | 2 steel poles for vestibule | Reinforced steel pegs, 25 cm long and 2 mm thick

Entrance and ventilation: Front vestibule door with window and side rain protections that roll up completely | Rear entrance | Ventilation sleeves | Liftable snow flap for excellent ventilation (when rolled up) or protection in case of bad weather (if unrolled) | Inner tent doors and windows with outer mosquito net and fully closable inner cover.

Storage: Internal storage pockets | Gear loops

Accessories: Multipoint guy line system to secure the tent and provide greater structural resistance in case of strong winds | Tape to adjust the distance from fly-sheet to base, for excellent tensioning and to allow more or less air to enter, based on the climate and weather conditions | Tape loops on the corners of the fly-sheet to secure the tent, if set up on snow, with ice axes, skis or other anchorages | Reinforced stuff sack in polyethylene with compression straps and double carry handle | Reinforced polyethylene bag for poles and pegs | Repair kit | Set up instruction video activated by QR Code.

Colle Sud

99094 W

* fly sheet, inner tent and poles only

Colle Sud is an expedition tent with stable, robust geodesic structure. Can sleep up to 6 people.

Structure: Geodetic

Materials: Fly sheet in aluminised polyester Oxford, Water Resistant to 4.000 mm | Inner tent in waterrepellent, breathable nylon Ripstop | Aluminised polyester Oxford floor, Water Resistant to 4.000 mm | Taped seams to guarantee total waterproofing

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong

and elastic | 7 shockcorded duraluminium poles, diameter 13 mm | Different coloured poles for easier set up | Inner tent overhung using continuous mesh sleeves | Aluminium pegs

Entrance and ventilation: Double entrance | Ventilation sleeves and outlets | Auxiliary vents | Lifiable snow flap

Storage: Inside pockets

Accessories: Guy lines to secure the tent connected directly to the poles for maximum stability | Stuff sack for tent included | Repair kit included

Portaledge

120 cm
Ø30 cm

200x120
cm

9.6 kg

99111 W

Portaledge is tent for big wall climbers.

Structure: Loadbearing structure consisting of: Duraluminium perimeter poles, diameter 30 mm, connected together by stainless steel joints | Removable central tension bar in duraluminium: diameter 30 mm | 9 support/tensioning belts for the structure with steel buckle adjustment | Top anchor plate in steel to secure the tent to the wall

Materials: Aluminised 210D polyester Oxford canvas, W/R to 4.000 mm (cover) | Base in tearresistant 600D Supertex®: non slip, resistant to moisture (portaledge) | Case in 1200 D reinforced Supertex® | Double reinforcements in PVC fabric (phthalate free) in points subject to the most wear | Taped seams in the waterproof canvas cover | Transparent TPU window

Entrance and ventilation: Two entrances | Ventilation sleeve

Accessories: Daisy chain for gear

Cover Portaledge

42 cm
Ø14 cm

2 kg

99109 W

The Ferrino Portaledge has been made for those who have to spend one or more nights on the face. The bed can be used uncovered or according to weather conditions, it can also be covered with the handy canvas that will make sure it is waterproof.

Structure: Supporting structure consisting of: Duraluminium perimeter tubes, diameter 30 mm, connected with stainless steel joints | Removable central tensioning bar in duraluminium: diameter 30 mm. | 9 Support/tensioning straps for the structure, with steel buckle adjustment | Top anchor plate in steel for fastening to the face

Materials: Outer sheet in 210 D aluminised Oxford Polyester, W/R 4.000 mm (cover) | Internal structure in 600D tearproof, nonslip and moisture resistant Supertex® (portaledge) | Taped seams in the cover canvas | TPU window

Entrance and ventilation: (Cover) Two entrances | Ventilation outlet.

Accessories: Stuff sack in 1200 D reinforced Supertex® | Double reinforcements in the points most subject to wear | Daisy chain for gear

Features

Triple Reinforcement

3 layer construction floor corners reinforcement.

Fire Retardant

Fire retardant fabrics comply to the specifications of the CPAI-84 standard.

Liftable Flap

To get the tent adjusted according to the weather conditions – to get it more closed or open either for a better ventilation or to protect the inner tent in case of bad weather conditions.

Poles

Tempered 7001 T6 aluminium alloy poles with exceptional characteristics of lightness, resistance and elasticity

Tape Adjustment

To attach and regulate the distance of the fly-sheet to the base.

Ventilation Outlets

Storm proof ventilation outlets

Guy Ropes System

Multipoint guy rope system that prevents poles from bending and breaking in case of strong winds.

Floor Corner

To fix the tent to snow with ice-axes, skis or other moorings.

Recycled Fabric

You are buying a product made from 100% recycled, GRS-certified fabric.

Global Recycled Standard “GRS” is an international certification promoted by the Textile Exchange with the aim of encouraging the use of recycled materials in the textile industry.

GRS stands for:

- **Clear information about the characteristics of the recycled raw material.**
- **Standards that can guarantee ethical working conditions.**
- **Rules to reduce environmental impacts and harmful chemicals to a minimum.**

Ferrino has adopted this certification, acknowledging the vital importance of a sustainable production and consumption model. In this way we are providing our contribution by reducing consumption of resources (virgin raw material water & energy used in production) yet maintaining a specific standard when transitioning to such fabrics.

99057 LAAFR

* fly sheet, inner tent and poles only

1 person, 4 season tent for all those seeking minimum size and weight

Structure: Double cross

Materials: Flysheet in 100% Recycled 70D Polyester Ripstop, 85 g/m² coated with thermalinsulated, aluminised polyurethane, and waterproof to 3.000 mm. Water repellent, with FR treatment | Inside in waterrepellent and breathable 70D Polyester Ripstop, 55 g/m², with FR treatment | Floor in 100% Recycled 70D, 95 g/m² polyester, coated with thermalinsulated polyurethane, waterproof to 8.000 mm. Water repellent, with FR treatment | Front window in clear TPU | Taped seams in flysheet and floor | Three layer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 2 shockcorded duraluminium poles with double

crossover structure | Inner tent hung from poles with pole guide sleeves | Hexagon aluminium pegs

Entrance and ventilation: Front vestibule | Door with mosquito net exterior that opens out fully and folds into a special pocket | Ventilation sleeves

Storage: Internal storage pockets and gear loops

Accessories: Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings | Adjustable fly sheet distance from the base using aluminium buckles, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Reflective multi-point guy line system to prevent the breakage or deformation of poles in strong winds | Internal lamp hook | Stuff sack | Repair kit included | Instruction video activated with QR code

Manaslu 2

99070 LAAFR

* fly sheet, inner tent and poles only

Manaslu 2 is the 4 season, 2 person tent for all those seeking space, minimum weight, easy set up and top performance in terms of reliability, thanks to the duraluminium structure with radial joints.

Structure: Tunnel

Materials: Fly sheet in 100% Recycled Polyester Ripstop 70D, 85 g/m², polyurethane coating, aluminised and thermal insulating, waterproof to 3.000 mm, water repellent with FR treatment | Inner tent in Polyester Ripstop 70D, 55 g/m², water repellent and breathable with FR treatment | Floor in 100% Recycled Polyester 70D, 95 g/m², thermal insulating polyurethane coating, waterproof to 8.000 mm, water repellent with FR treatment | Front window in transparent TPU | Taped seams in flysheet and floor | Three layer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | Loadbearing structure with shockcorded duraluminium poles and radial joints | Inner tent hung from poles with hooks and sleeves | "Hexagon" aluminium pegs

Entrance and ventilation: Front vestibule | Door with mosquito net exterior that opens out fully and folds into a special pocket | Ventilation sleeves | Lifiable snow flap on base perimeter of the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

Storage: Internal storage pockets and gear loops

Accessories: Tape adjustment for the fly sheet, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Reflective storm guy lines | Lamp hook | Stuff sack | Repair kit | Instruction video activated with QR code

Trivor 2

99058 LAAFR

All-season tent with external pole system that makes fast set-up possible without getting the room wet, even in harsh weather conditions.

Structure: Dome

Materials: Fly sheet in 100 % Recycled 70D Polyester Ripstop, 85 g/m² coated with thermal insulated, aluminised polyurethane, and waterproof to 3.000 mm. Water repellent, with FR treatment | Inside in water repellent and breathable 70D Polyester Ripstop, 55 g/ m², with FR treatment | Floor in 100 % Recycled 70D, 95 g/m² polyester, coated with thermal insulated polyurethane, waterproof to 8.000 mm. Water repellent, with FR treatment | Windows in clear TPU | Taped seams in fly-sheet and floor | Three-layer construction to reinforce the floor corners

Poles: 3 poles in shock-corded duraluminium in different colours for easier set up | External poles | Inner tent hung from the fly-sheet using tapes, rings and toggles | "Hexagon" aluminium pegs

Entrance and ventilation: Two vestibules | Fully opening doors with mosquito net exterior that fold into a special pocket | Ventilation sleeves with stormproof system

Storage: Internal storage pockets and gear loops

Accessories: Multipoint guy line system to prevent the breakage or deformation of poles in strong winds | Reflective guy lines | Lamp hook | Stuff sack | Repair kit | Instruction video activated with QR code

Svalbard 3.0

99056 LAAFR

* fly sheet, inner tent and poles only

Svalbard 3.0 is the 4 season tent that best embodies Ferrino's spirit of adventure; a trusty companion in terms of reliability and versatility, and excellent in all 4 seasons in the mountains or anywhere else that trekkers and climbers decide to take it.

Structure: Double cross

Materials: Fly sheet in 100% Recycled Polyester Ripstop 70D, 85 g/m², coated with aluminised and thermal insulating polyurethane, waterproof to 3.000 mm., water repellent with FR treatment | Inner tent in water repellent and breathable Polyester Ripstop 70D, 55 g/ m² with FR treatment | Floor in Polyester Oxford 210D, 130 g/ m², coated with thermal insulating polyurethane, waterproof to 8.000 mm., water repellent with FR treatment | Transparent TPU windows | Taped seams in fly sheet and floor to guarantee waterproofing | Three layer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 3 shockcordinated duraluminium poles | Different co-

loured poles for easier set up | Inner tent hung from poles with pole guide sleeves | Aluminium pegs

Entrance and ventilation: Vestibules to protect the two entrances, front and back with extra room for bulky equipment | Fully opening doors with mosquito net exterior, which fold into a special pocket | Stormproof ventilation sleeves | Liftable snow flap on base perimeter of the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

Storage: Internal storage pockets

Accessories: Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings. | Adjustable fly sheet distance from the base for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Reflective multipoint guy line system to prevent the breakage or deformation of poles in strong winds | Internal lamp hook | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code

Lhotse 4

99069 LAAFR

* fly sheet, inner tent and poles only

Lhotse 4 is the 4 person tent that is ideal for base camp use. A shelter that offers maximum comfort and room, together with robustness, ventilation and heat insulation.

Structure: Dome

Materials: Fly sheet in 100 % Recycled Polyester Ripstop 70D, 85 g/m², polyurethane coating, aluminised and thermal insulating, waterproof to 3.000 mm, water repellent with FR treatment | Inner tent in Polyester Ripstop 70D, 55 g/m², water repellent and breathable with FR treatment | Floor in 100 % Recycled Polyester 70D, 95 g/m², thermal insulating polyurethane coating, waterproof to 8.000 mm, water repellent with FR treatment | Transparent TPU windows | Taped seams in fly sheet and floor to guarantee waterproofing | Threelayer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong

and elastic | 3 poles in shockcorded duraluminium in different colours for easier set up | Inner tent hung from poles with hooks and sleeves for easy set up | "Hexagon" aluminium pegs

Entrance and ventilation: Two vestibules | Fully opening doors with mosquito net exterior, which fold into a special pocket | Ventilation sleeves | Lifiable snow flap on base perimeter of the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

Storage: Internal storage pockets | Gear loops | Removable storage on the inside ridge of the inner tent

Accessories: Multipoint guy line system to prevent the breakage or deformation of poles in strong winds | Tape adjustment for the fly sheet base, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Lamp hook | Stuff sack | Repair kit | Instruction video activated with QR code

Features

Fast Adjustment

F.A. "Fast Adjustment" system for guy ropes.

Fire Retardant

Fire retardant fabrics comply to the specifications of the CPAI-84 standard.

Tape Adjustment

To attach and regulate the distance of the fly-sheet to the base.

Poles

Tempered 7001 T6 aluminium alloy poles with exceptional characteristics of lightness, resistance and elasticity

Triple Reinforcement

3 layer construction floor corners reinforcement.

Recycled Fabric

You are buying a product made from 100% recycled, GRS-certified fabric.

Global Recycled Standard "GRS" is an international certification promoted by the Textile Exchange with the aim of encouraging the use of recycled materials in the textile industry.

GRS stands for:

- Clear information about the characteristics of the recycled raw material.
- Standards that can guarantee ethical working conditions.
- Rules to reduce environmental impacts and harmful chemicals to a minimum.

Ferrino has adopted this certification, acknowledging the vital importance of a sustainable production and consumption model. In this way we are providing our contribution by reducing consumption of resources (virgin raw material water & energy used in production) yet maintaining a specific standard when transitioning to such fabrics.

Skyline Alu

91186 HBBA

* fly sheet, inner tent and poles only

Skyline 3 Alu is a 3 season tent for hiking and trekking, designed also for mountain use.

Structure: Half Dome

Materials: Fly sheet in Polyester Diamond 70D, 75 g/m², polyurethane coating, thermal insulating, waterproof to 2000 mm, water repellent | Inner tent in Waterproof and breathable Polyester Diamond | Floor in Oxford Polyester 150D, 110 g/m², thermal insulating polyurethane coating, waterproof to 2500 mm, water repellent | Taped seams in fly sheet and floor to guarantee waterproofing | Three layer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 3 shock corded duraluminium poles | Veranda arch in different coloured poles for easier set up | Steel pegs | Inner

tent hung from poles with hooks for faster set up

Entrance and ventilation: Vestibules | Fully opening doors with mosquito net exterior, which fold into a special pocket | Ventilation sleeves | Liftable snow flap for guaranteed excellent ventilation (when rolled up) or to protect the tent interior in case of bad weather (if unrolled)

Storage: Internal storage pockets

Accessories: Adjustable fly sheet distance from the base using tape for excellent tensioning and ventilation | Storm guy lines | Lamp hook | Stuff sack | Repair kit | Instruction video activated with QR code

Shaba 3

92031 CBB

* fly sheet, inner tent and poles only

Shaba 3 is a 3 person tent for 3 seasons, designed for those who love camping but don't want to give up any of the comfort that a high, roomy tent can provide.

Structure: Dome

Materials: Fly sheet in Polyester Diamond 70D, 75 g/m², polyurethane coating, thermal insulating, waterproof to 2.000 mm, water repellent | Inner tent in waterproof and breathable Polyester Diamond | Floor in Oxford Polyester 150D, 110 g/m², thermal insulating polyurethane coating, waterproof to 2.500 mm, water repellent | Additional, removable floor in waterproof Polyethylene for the living area | Taped seams in fly sheet and floor to guarantee waterproofing | Three layer construction to reinforce the floor corners

Poles: 3 shock corded fibreglass poles | Preformed veranda pole for greater living space | Veranda arch in different coloured poles for easier set up | Steel pegs | Inner tent hung from poles with hooks for easy set up with sleeves on the ridge pole

Entrance and ventilation: Vestibules | Fully opening doors with mosquito net exterior, which fold into a special pocket | "Air Ventilation System" with large mosquito net | Ventilation sleeves | Liftable snow flap for guaranteed excellent ventilation (when rolled up) or to protect the tent interior in case of bad weather (if unrolled)

Storage: Internal storage pockets

Accessories: Additional and removable floor for the living area | Storm guy lines | Lamp hook | Stuff sack | Repair kit

Features

Tape Adjustment

To attach and regulate the distance of the fly-sheet to the base.

Guy Ropes System

Multipoint guy rope system that prevents poles from bending and breaking in case of strong winds.

Stuff Sack

Large stuff sack in Supertex® with compartment for poles and pegs reinforced in polyethylene

Fibreglass

Poles in ultra-strong fibreglass and pre-formed steel.

Triple Reinforcement

3 layer construction floor corners reinforcement.

Fenix 4

91192 MBB

Roomy and comfortable 4-person tent with large front vestibule to make it ideal for campsite holidays. To add to the living space, it can also be combined with the 4-person canopy (Art. 91220MDD).

Structure: Tunnel

Materials: Fly-sheet in 70D Polyester Honey, 75 g/m² coated with thermal-insulated, aluminised polyurethane, and waterproof of 2000 mm | Inner tent in water-repellent, breathable polyester | Inner tent floor in 70D polyester, 80 g/m², waterproof to 2500 mm Fly-sheet floor in waterproof polyethylene fully welded and waterproof to > 10,000 mm | Taped seams in fly-sheet and inner tent floor for total waterproofing | Three-layer construction to reinforce the floor corners

Poles: 3 identical shock-corded poles in fibreglass | External poles | Inner tent hung from poles with tapes and toggles | Steel pegs

Entrance and ventilation: Large front vestibule | Ventilation sleeves and windows | Front, side and rear entrance | "Air Ventilation System" with large mosquito net; air intakes and windows to air the tent | Front and side door in fly-sheet with inside mosquito net | Clear windows in the front of the fly-sheet

Storage: Internal storage pockets

Accessories: Adjustable distance between fly-sheet and base, for optimum tensioning | Floor on opening front door | Sleeping area with removable partition | Opening in fly-sheet to duct power cables | Multi-point guy-line system to secure the tent, for better structural resistance in case of strong winds | Internal lamp hook | Large stuff sack in Supertex | Repair kit | Instruction video for set up, with QR code activation

Fenix 5

91193 LBB

Family camping tent designed for 5 people. Complete with large front vestibule to make it ideal for holiday camping. To add to the living space, the tent can fit the 5-place canopy (Art. 91221LDD).

Structure: Tunnel

Materials: Flysheet in 70D Honey polyester, 75 g/m² coated with thermalinsulated, aluminised polyurethane, and waterproof to 2.000 mm. | Inner tent in waterrepellent, breathable polyester | Inner tent floor in 70D polyester, 80 g/m², waterproof to 2.500 mm | Fly sheet floor in waterproof, fully welded polyethylene, waterproof >10.000 mm | Taped seams in flysheet and inner tent floor for total waterproofing | Three layer construction to reinforce the floor corners

Poles: 3 equal shock corded fibreglass poles | External poles |

Inner tent hung from poles with tapes and toggles | Steel pegs

Entrance and ventilation: Large front vestibule | Front, side and rear entrance | "Air Ventilation System" with large mosquito net; air and windows to ventilate the tent | Front and side door in fly sheet with interior mosquito net | Transparent windows in the front section of the fly-sheet

Storage: Internal storage pockets

Accessories: Adjustable fly-sheet distance from base, for excellent tensioning | Floor on opening front door | Sleeping area with partition | Specific opening in fly-sheet to duct electrical cables | Multi-point guy-line system to secure the tent, for improved structural resistance in case of strong winds | Internal lamp hook | Large stuff sack in Supertex | Repair kit included | Instruction video for set up with QR code activation

NEW

Fenix 6

91194 MBB

Fenix 6 is a roomy and comfortable family tent with large front vestibule to make it ideal for campsite holidays. To add to the living space, it can also be combined with the 6-person canopy (Art. 91222MDD).

Structure: Tunnel

Materials: Fly-sheet in 70D Polyester Honey, 75 g/m² coated with thermal-insulated, aluminised polyurethane, and waterproof to 2000 mm | Inner tent in water-repellent, breathable polyester | Inner tent floor in 70D polyester, 80 g/m², waterproof to 2500 mm Fly sheet floor in waterproof polyethylene, fully welded and waterproof to > 10,000 mm | Taped seams in fly-sheet and inner tent floor for total waterproofing | Three-layer construction to reinforce the floor corners

Poles: 3 identical shock-corded poles in fibreglass | External po-

les | Inner tent hung from poles with tapes and toggles | Steel pegs

Entrance and ventilation: Large front vestibule | Ventilation sleeves and windows | Front, side and rear entrance | "Air Ventilation System" with large mosquito net; air intakes and windows to air the tent | Front and side door in fly-sheet with inside mosquito net | Clear windows in the front of the fly-sheet

Storage: Internal storage pockets

Accessories: Adjustable distance between fly-sheet and base, for optimum tensioning | Floor on opening front door | Sleeping area with removable partition | Opening in fly-sheet to duct power cables | Multi-point guy-line system to secure the tent, for better structural resistance in case of strong winds | Internal lamp hook | Large stuff sack in Supertex | Repair kit | Instruction video for set up, with QR code activation

Altair 5

92169 IWW

Family tent with pre-formed inflatable pneumatic structure in place of the traditional poles for improved comfort . This system, together with the comfort of the pre-assembled inner tent, offers quick and easy set-up using the air pump (included).

Structure: Tunnel

Materials: Fly-sheet in 210D Oxford polyester, 130 g/m² coated with thermal-insulated, aluminised polyurethane, and waterproof to 2.500 mm. Water repellent. | Inner tent in water-repellent, breathable polyester | Inner tent floor in 70D polyester, 80 g/m², waterproof to 2.500 mm. Water repellent | Fly sheet floor in fully welded waterproof polyethylene. Waterproof to >10.000 mm | Taped seams to guarantee total waterproofing | Three-layer construction to reinforce the floor corners

Poles: 3 independent, pre-formed and air-filled elements for greater comfort | 1 air-filled element for side veranda | 1 pre-formed

steel pole for additional canopy | Inner tent secured to the fly-sheet using tapes and adjustment buckles | Steel pegs

Entrance and ventilation: Large front vestibule | Front, side and rear | Sleeping area doors with exterior mosquito net | Front, side and rear door in fly sheet with interior mosquito net | "Air Ventilation System" with large mosquito net; air intakes and windows to ventilate the tent | Transparent window with shade in fly-sheet | Transparent windows in the additional canopies

Storage: Internal storage pockets

Accessories: Removable front canopy | Air pump for inflation included | Adjustable fly-sheet distance from base, for excellent tensioning. | Floor on opening front door | Sleeping area with partition | Specific opening in fly-sheet to duct electrical cables | Multi-point guy-line system to secure the tent, for improved structural resistance in case of strong winds | Large stuff sack in Supertex | Repair kit included | Internal lamp hook | Instruction video for set up with QR code activation

Flow 4

92168 FMM

Flow 4 is the 4 person family camping tent with inflatable structure instead of a traditional pole frame for quick and easy setup.

Structure: Tunnel

Materials: Flysheet in 70D polyester Diamond, 75 g/m², coated with thermalinsulated, aluminised polyurethane, waterproof to 2.000 mm. Water repellent | Inner tent in waterrepellent, breathable polyester | Inner tent floor in 70D polyester, 80 g/m², waterproof to 2.500 mm. Water repellent | Fly sheet floor in waterproof, fully welded polyethylene, waterproof >10.000 mm | Taped seams to guarantee total waterproofing | Three layer construction to reinforce the floor corners

Poles: 3 independent inflatable elements with repair kit | Inner

tent secured to the flysheet using loops | Steel pegs

Entrance and ventilation: Large front vestibule | Front, side and rear | Sleeping area doors with exterior mosquito net | Side door in fly sheet with inner mosquito net | "Air Ventilation System" system with large mosquito net; air intakes and windows to ventilate the tent

Storage: Internal storage pockets

Accessories: Air pump for inflation included | Adjustable fly sheet distance from the base, for excellent tensioning | Multipoint guyline system to secure the tent, for improved structural resistance in case of strong winds | Large Supertex stuff sack | Repair kit included | Internal lamp hook | Instruction video for set up with QR code activation

Chanty 5 Deluxe

92162 CWW

Chanty 5 Deluxe is the 5 person family tent that is comfy, roomy, hardwearing and complete with lots of features for campsite holidays.

Structure: Tunnel

Materials: Flysheet in 70D Diamond polyester, 75 g/m² coated with thermalinsulated, aluminised polyurethane, and waterproof to 2.000 mm. | Inner tent in waterrepellent, breathable Diamond polyester | Inner tent floor in 70D, 80 g/m² polyester, waterproof to 2.500 mm. | Fly sheet floor in waterproof, fully welded polyethylene, waterproof >10.000 mm | Inner tent hung from exterior poles with buckles | Taped seams in flysheet and inner tent floor | Three-layer construction to reinforce the floor corners

Poles: 3 shockcorded, preformed fibreglass poles for superior li-

ving space | External poles | Steel pegs

Entrance and ventilation: Front, side and rear entrance | Large front vestibule | Ventilation sleeves and windows | Room doors with exterior mosquito net ("Air ventilation System") | Roof doors with internal mosquito net ("Air ventilation System")

Storage: Internal storage pockets

Accessories: Multipoint guyline system to secure the tent, for improved structural resistance in case of strong winds | Adjustable fly sheet distance from the base for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Internal lamp hook | Supertex stuff sack for tent included | Repair kit included | Instruction video for set up with QR code activation

99124 EMM

Roomy and comfortable 4 person tent with large front vestibule to make it ideal for campsite holidays.

Structure: Tunnel

Materials: Flysheet in 70D polyester Honey, 75 g/m² coated with thermalinsulated, aluminised polyurethane, and waterproof to 2.000 mm. Water repellent | Inner tent in waterrepellent, breathable polyester | Inner tent floor in 70D polyester, 80 g/m², waterproof to 2.500 mm, water repellent | Fly sheet floor in waterproof, fully welded polyethylene, waterproof >10.000 mm | External poles | Taped seams to guarantee total waterproofing | Threelayer construction to reinforce the floor corners

Poles: 3 shock corded fibreglass poles | Inner tent hung from poles

with tapes and toggles | External poles | Steel pegs

Entrance and ventilation: "Air Ventilation System" with large mosquito net; ventilation sleeves and windows | Large front vestibule | Front and side | Room doors with mosquito net | Side door in fly sheet with inner mosquito net

Storage: Internal storage pockets

Accessories: Adjustable fly sheet distance from the base, for excellent tensioning | Multipoint guyline system to secure the tent, for improved structural resistance in case of strong winds | Internal lamp hook | Large Supertex stuff sack and bag | Repair kit included | Instruction video for set up with QR code activation

HL Mystic

HL Mystic is the microfibre sleeping bag with top-of-the-range heat insulation performance and light weight. Ideal for mountaineering activities.

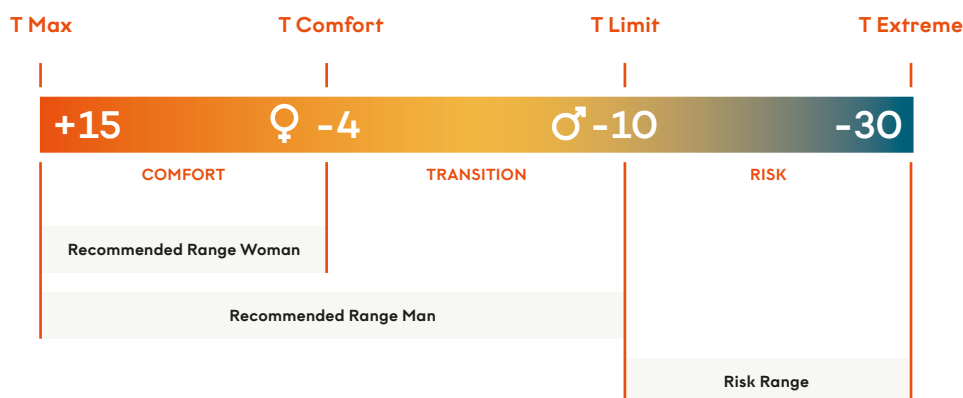

HL Revolution

HL Revolution 1200 WTS is the ideal sleeping bag for those looking to sleep comfortably on expeditions in extreme conditions, since it provides heat insulation up to -45°C and comfort at around -22°C (man).

We use the EN ISO 23537-1:2016

All of our sleeping bags are tested to the European EN13537 standard and the subsequent EN ISO 23537-1:2016, by an independent textile research body. A special mannequin, fitted with sensors, is

inserted into the sleeping bag and identifies the optimum user temperature according to the temperature of the environment.

Definition of comfort and extreme values

Maximum comfort temperature

This is the maximum temperature that allows a standard man to sleep without perspiring excessively. It is established with the sleeping bag zips and hood open and the arms outside.

Comfort temperature

This is the temperature level (referred to a standard woman) at which it is possible to sleep all night in a relaxed position.

Lower comfort limit

Is the minimum temperature (referred to a standard adult man at which it is possible to sleep in a curled up position, without waking, for eight hours.

Extreme temperature

This is the minimum temperature at which the sleeping bag protects the user (standard adult woman) against hypothermia. It allows six hours of uncomfortable sleep without the internal temperature dropping to a dangerous level.

When you choose your sleeping bag, we suggest that you consider comfort and intermediate temperatures, according to your level of physical fitness. When we feel hot or cold, it is caused by our body producing greater or smaller amounts of heat compared to what we are losing to the surrounding environment.

Features

Offset Seams

To prevent heat dispersion, the seams between the inner and outer layers are never communicating.

Welded Technical System

Used to eliminate outer seams, replacing them with welded channels. Heat dispersion is reduced to a minimum, as is any feather loss over time.

Shingle Construction

"Shingle" tile construction. Better heat insulation in the same size.

Filling

Extradown

The Extradown filling consists of goose feathers and down (with maximum heat power).

Microfiber

A combination of 2D and 3D micro fibres to offer an excellent softness that is comparable only to down. Excellent resilience together with thermal efficiency make this one of the most cutting-edge manmade fibres. It also maintains its thermal capacity when damp or compressed.

Fabrics

20D 380T Polyester

For those who want the utmost comfort and at the same time, extreme resistance. Particularly suited as a liner fabric for top-performance sleeping bags.

Nylon 30D 184T mini ripstop

The hand and light weight of the fabric bring out the best qualities of the products on which they are used! Its fibre-proof characteristics guarantee the life-long durability of your sleeping bag.

Nylon 20D 380T mini ripstop

Specially developed for use with W.T.S technology, this ultra-light Nylon Ripstop amazes for its resistance, combining excellent breathability with anti-feather-loss properties.

Filling: 960 g Microfiber Polyester

Features: Thermal comfort around -10°C (man) | Filling with "shingle - tile" construction | Central zipper | Zip baffle and padded heat collar | Easier opening with the "One Touch" system | Anti-snap tape | Bag with compression tapes included

Down Filling

Lightec Duvet

A range of down sleeping bags for the more demanding user. Perfect for those looking for maximum performance, extremely limited weight, excellent insulation and compact dimensions.

Features

Offset Seams

To prevent heat dispersion, the seams between the inner and outer layers are never communicating.

Filling

RDS Certified Down

The aim of the Responsible Down Standard (RDS) is to guarantee consumers that the feathers and down used for filling have been obtained from animals that have been treated in a way that did not cause them pain, suffering or distress. The “RDS” control process includes the whole production chain and is extended to: farming | collection and processing of feathers (selection, dust removal, intensive washing, elimination of excess water, drying) | manufacture of items

Tracking: Every stage in the supply chain must be managed in such a way that certified products cannot be confused and/or replaced with others. It allows the end customer to view the names of certified companies on the R.D.S. website. Ferrino will also be on this list.

Down

The duck down to feather ratio, expressed in percentage terms, is the identity card of a down sleeping bag. The CUIN unit of measurement expresses the loft height in inches of every 30 g of feathers. A higher value means a higher degree of heat insulation.

Fabric

390T 20D Nylon

Fabric with excellent breathability, resistance and light weight. Recommended as sleeping bag shell and lining material. Featherproof and resistant to UV rays.

Shell: 100% Nylon 390T 20D

Liner: 100% Nylon 390T 20D

Filling: **Lighttec 1400:** 900 g down 80/20 550 cuin | **Lighttec 1200:** 650 g down 80/20 550 cuin | **Lighttec 1000:** 450 g down 80/20 550 cuin | **Lighttec 800:** 300 g down 80/20 550 cuin | **Lighttec 500:** 200 g down 80/20 550 cuin

Features: Minimum heat loss, thanks to the staggered seams | Easier opening with the "One Touch" system | 3D shape in the foot area for improved comfort | "2-way" zipper on the sides and zipper in the foot area | Cold protection hood | Zip baffle | Inside pocket | Stuff sack included

Lighttec Duvet 500: Extremely light and compact. Can be used as a liner together with a warmer sleeping bag for improved cold protection. Our tests show that it increases heat insulation comfort values by 7-8°C.

Features: Easy "one touch" opening system | Inside pocket | Stuff sack

Synthetic Filling

Nightec

The ideal sleeping bags for 4-season use. The Micro fibre manmade filling and Dual-zip system guarantees maximum thermal efficiency.

Lightec SM 1100

These sleeping bags with extremely reduced size and weight offer excellent heat performance thanks to the "shingle" construction.

Features

Offset Seams

To prevent heat dispersion, the seams between the inner and outer layers are never communicating.

Shingle Construction

"Shingle" tile construction Better heat insulation in the same size.

Filling

High Thermal Fiber Compact®

A fibre that combines great strength with excellent weightlessness. This particularly compact fibre has been designed to guarantee excellent heat insulation while preserving its original form over time. Its three constituent fibres guarantee exceptional compressibility and softness. Washable, odourless, anallergic and free from chemical additives.

High Thermal Fiber Performance®

A highly thermal fibre that limits heat dispersion thanks to the hollows in its fibres. An insulating material of the highest quality, developed as the ideal solution for particularly harsh climates and weather conditions. It is created from two hollow fibres of different thickness, which trap air without heat dispersion. Washable, odourless, anallergic and free from chemical additives.

Microfiber

A combination of 2D and 3D micro fibres to offer an excellent softness that is comparable only to down. Excellent resilience together with thermal efficiency make this one of the most cutting-edge manmade fibres. It also maintains its thermal capacity when damp or compressed.

Repreve®

Repreve® is a fibre made in 100% recycled polyester of the highest quality, made from recycled materials (including plastic bottles) to reduce plastic pollution and help to preserve our natural resources. This fibre guarantees lasting quality you can rely on.

Fabric

35% Cotton 65% Polyester

The dense weave prevents feather loss.

190T Polyester

Strong polyester fibre that provides excellent resistance to UV rays.

Pongee 240T Polyester

Its softness makes it especially suited to the inside of the sleeping bag. It is also hardwearing and stands out for its lightness and breathability.

210T Dobby 70D Ristop Polyester 300T Ristop Polyester

The polyester fibre offers excellent resistance to UV rays, while the Ripstop weave gives it the capacity to resist against tearing.

Nylon 310T 40D Diamond Ristop

Particularly suited for the shell and liner of the sleeping bag, due to its excellent breathability and resistance combined with the maximum in terms of light weight.

30D 360T recycled ripstop polyester

Recycled fabric with GRS certification, made using post-consumer plastic bottles and old clothing. The polyester fibre offers excellent resistance to U.V. rays, while the ripstop construction makes it resistant to tearing.

66D 190T recycled polyester

Recycled fabric with GRS certification, made using post-consumer plastic bottles and old clothing. The polyester fibre offers excellent resistance to U.V. rays.

We use the ASTM F3340-18/ 2020

All of our tested air mattresses undergo the procedures required in the ASTM F3340-18/ 2020 standard, by an independent textile research laboratory. Measurement of thermal resistance of the air mattress (known as the R value) includes placing the sample between a hot plate (simulating the user's body heat) and a cold plate (simulating the temperature of the floor) and measu-

ring the heat exchange. The higher the heat transferred from the hot plate to the cold one through the sample, the lower the thermal resistance. A higher R coefficient value (**R value**), means better insulation.

Air mattresses with values between 0 and 1.9 are recommended for summer use, 2-3.9 are suitable for three-season use, while values above 4 are suitable for winter use.

Notes	A lighter weight for a total comfort	High resistance combined with medium weight	Permanent natural antimicrobial	Higher fast drying performances

Fabrics

Primaloft®

Silver Insulation: PrimaLoft® Silver Insulation is a go-to for technical performance. It is engineered for a full spectrum of benefits – millions of air pockets trap body heat in extreme conditions and lack of bulk means great freedom of movement for the activity. The PrimaLoft® proprietary treatment ensures excellent performance as the insulation maintains its warmth properties even in wet conditions. On top of all that, PrimaLoft® Silver Insulation is designed for durability in a lightweight design for active applications, packability, breathability, and softness. No need to compromise your performance.

Thermoplume Insulation: Small, silky fibre feathers mixed to imitate the heat, lightness, softness and compressibility of natural goose down. This special mix of fibres, patented by PrimaLoft® has all you need from a practical filling that can give you insulating loft, protection against rain and compressibility.

Black Insulation: PrimaLoft® Black Insulation delivers all the performance needed to tackle the adventures of everyday. PrimaLoft® Black Insulation features all the necessities for a thermally efficient insulation and adds the benefits of softness, packability, and loft. As a PrimaLoft® product, it offers lightweight warmth without the bulk, and is more down-like in hand feel than any other insulation in its class.

Polartec Power Dry

Polartec® Power Dry® fabrics are designed to keep your skin dry when you sweat. All fabrics in this series feature a patented bicomponent knit construction that uses different yarns on either side of the fabric. This creates two different surfaces: one that is optimized to move moisture away from the skin, the other to dry quickly.

Polartec® Alpha®

Polartec® alpha® direct is an evolution of original alpha® technology that eliminates the need for a backing fabric to create an enclosed fabric package. By refining the shape and size of its lofted fibers, alpha® direct can be in direct contact with skin or other fabric layers. This new design ability increases breathable performance, expands versatile style options, and further reduces overall garment weight. Polartec® alpha® direct active insulation works by continuously releasing excess body heat before it builds to cause saturation and discomfort. This patented, adaptive quality is made possible through alpha's unique lofted fiber structures connected to a solid mesh core. And since polartec® alpha® direct is inherently hydrophobic, it resists all moisture and dries incredibly fast.

Polartec Power Air

Is a revolutionary, new knit construction that encapsulates air to retain warmth and reduce microfiber shedding. The end result is a high performance fabric with advanced thermal efficiency that sheds at least 5x fewer microfibers than modern synthetic fleece materials. And while all fabrics will shed fibers over time, Polartec® Power Air™ is a step forward in reducing the environmental impact of what we make and wear.

Pontetorto

The made in Italy fabric by Pontetorto is made from Perpetual recycled polyester yarns and ECONYL® a nylon fibre that is 100% regenerated from fishing nets and other nylon waste.

ECONYL®: Is a nylon fibre that is 100% regenerated from fishing nets and other nylon waste.

Perpetual has developed a unique, developmental technology to convert plastic bottles into high quality filament yarns.

and ice axes | Conductive material inserts on index finger and thumb for the use of touchscreen devices. | Wind breaker soft shell fabric: designed to offer optimal wind protection and excellent breathability.

Accessories

Cup

Stainless steel cup with snap-hook.

Thui

Thui is a telescopic, folding, fast hiking and trail running pole with automatic assembly system (ATP - Automatic Telescopic Pole), for the more demanding user who needs light weight, reliability, and a compact size.

Extreme

At an external temperature of 5°C, an internal temperature of 50 °C is maintained for 16 h for mod. 0,35 l, 0,5 l; 60°C for mod. 0,75 lt and 65°C for mod. 1 lt.

Pure

In aluminium with screw cap to open and close the bottle quickly and easily.

Use

Winter	Hiking	Trail Running	Nordic Walking	Fast Hiking
--------	--------	---------------	----------------	-------------

Measures

Pole Extension

The pole, which is divided into 2 or 3 telescopic sections, can be adjusted to optimum height within the range of the extension piece.

Features

Lock & Go

Quick and effective locking using an outer lever mechanism to adjust pole length, even while wearing gloves.

According to the different models, each pole has a snow roller, roller or silent tip

Nordic Walking Fast Adjustment System

Rapid hand strap release system to free hands immediately in a single movement.

The end of the tip is extended and guarantees maximum grip on all types of terrain, as well as being excellent in releasing heel lifts for ski mountaineering or next-generation snowshoes.

C Batura

WINTER

Triangular 62 cm - 135 cm
Shape600 g
per pair

78409 HCU

SPARE PART
INCLUDED:

Batura is a telescopic, tough pole for different purposes: winter trekking, snowshoeing, or ski mountaineering.

Main features: Section material: 7075 aluminium alloy | Section diameter: 18/16/13 mm | Structure with triangular section: for better resistance to bending | Lock&Go lever in aluminium | Anatomic non-slip hand grip | Tungsten tip | Two baskets included: winter, for snow, and multi-purpose, for trekking | Silent tip

3 triangular, telescopic sections in 7075 aluminium alloy $\varnothing 18/16/13$ mm | Anatomic, non-slip handgrip with extension covering a part of the first section | Tungsten tip | Aluminium lock & go lever THE TRIANGULAR SECTION of this pole gives it added flexibility compared to the traditional round section shape. This greater flexibility also means greater strength for the pole, which will be better able to withstand loads and stresses. According to laboratory tests, the flexural strength values of a pole with a triangular section and a diameter of 16/14/12 mm will be increased by 20 to 50% in the respective sections (top +20%, centre +35% and bottom +50%) compared to the same pole with a round section.

The Ferrino Warranty

Every Ferrino item has been studied in every detail and made using the most suitable materials for its intended purpose. The stringent “Ferrino Quality” controls guarantee that products are free from defects in material and workmanship. In the unlikely event that any defects of this type should appear, they are covered by this warranty, which is valid for two years from the date of purchase. High Lab products have 3 years warranty.

We would also like to remind you that: The warranty does not cover defects caused by improper use or normal wear and tear of parts following prolonged use. The purchaser must return the faulty item to the point of sale where the purchase was made, along with proof of purchase (a condition required for the validity of the warranty).

The retailer will then forward the item to the distributor or directly to Ferrino. Ferrino will, at its discretion, replace or repair the item. If the fault is not covered by the warranty, repairs will be carried out at low cost, inclusive of shipping or postage. This warranty does not affect the consumer’s statutory rights, as specified by the laws in force in the country of use.

Code of Conduct for Suppliers

For some time now, Ferrino has required its suppliers to underwrite a commitment to operate according to principles of mutual trust and absolute respect for human rights and protection of the working environment.

The company has recently re-launched a special programme to prevent the use of any labour under the age of 15, in compliance with the International Labour Organisation Convention no. 138.
