MAPLUS FLUORINE EXPERTS

From the passion for skiing and the mastery of the fluorine chemistry Maplus, a division specialized in ski wax and technical accessories for ski preparation, was born in 1997.

Thanks to the synergies with the industrial chemical research of Maflon SPA, a dynamic and innovative company specialized in the production of high-tech fluorinated products, owned by Mazza Holding of Castelli Calepio (Bg), this industrial company, 100% Italian, in just twenty years, braving more long-lived competitors out, has managed to reach a leading position in high-level competitions.

Since its debut in the cross-country World Championship in Ramsau in 1998, with the novelty of a perfluorinated liquid product, up to the successes of the Pyeongchang Olympics in 2017 and Åre 2019, Maplus has become, with its perfluorinated products, the reference in terms of gliding and durability in the ski and snowboard World Cups.

We can declare with satisfaction that today Maplus waxes are used in competition by all the National Teams and by all the ski companies present in the World Cup!

And yet Maplus does not care only of athletes and their results: the experience gained at the highest level has allowed us to develop a complete line of wax ideal to meet the needs of any skier and snowboarder, from the freeride addicted to the beginner who wants an easy to manage equipment, up to the needs of the professional laboratories for the rentals.

GENERAL CATALOG 2020/21

NEW ECO- FLUORWAX*

Respect for norms and the health of human beings and environmental have always been, and will continue to be, our priorities. In order to get our results in research and development of fluorinated products, we respect the most advanced rules in term of sustainable development. We have nevertheless invested the maximum of our energy and our efforts in finding new solutions and new products.

Now we are able to guarantee, in light of the new regulations, the utmost respect for anti-pollution and environmental protection standards together with the high standards skiwaxes to which our customers have been accustomed to for years.

*In compliance with Regulation (EU) 2017-1000.

FLASH
FLUORINATED
LIQUID POLYMER
HIGH SPEED ACCELERATOR

Fluorinated liquid polymer for racing. Use for wet, water-ice and icy snow from -3° to 0°C with completely transformed snow crystal with medium and big grain. It works great from hard coarse snow to wet snow and in all intermediate conditions while step by step the sun melts the snow. The Yellow Flash is also the best in raining conditions but only if it's raining over completely transformed snow as above mentioned. If it's snowing with new big moist and wet flakes together with raining on new moist and polish snow, Yellow Flash does not work. It needs at least one day of snow transformation then it works greatly. Air humidity from 60% to 100%. Excellent as accelerant and corrector at the start on fluorocarbon powder waxes or on fluorinated paraffins. Recommended cold application with the felt cap-applicator.

PRODUCTS

YELLOW FLASH
CODE: MW0662N
SIZE: 50 ml

USE SNOW TEMP: -3° / 0° C
HUMIDITY: 60 / 100%

HP3
HIGH FLUORINATED PARAFFIN

High fluoro powder paraffin for racing use as final product or as a base before applying fluorocarbon waxes FP4. Use for snow from -30°C to -10°C. Air humidity from 50% to 90%. This paraffin can be used alone as above mentioned or as a hardener for the high fluorinated paraffins HP3 VIOLET and HP3 RED in case of abrasive new or conserved snow or mixed with artificial snow. Use hot application with the waxing iron at 160°C.

PRODUCTS

HP3 GREEN POWDER
CODE: MW0900N
SIZE: 50 gr

USE SNOW TEMP: -30° / -10° C
HUMIDITY: 50 / 90%
APPLICATION: 160 °C E

HP3
HIGH FLUORINATED PARAFFIN

**HP3 BLUE MOLY
COLD ADDITIVE**

CODE: MW0901MN - 50 g
CODE: MW0911MN - 250 gr
CODE: MW0921MN - 1 kg

USE SNOW TEMP: -25° / -10° C
HUMIDITY: 50 / 90%
APPLICATION: 150° / 160 °C E

High fluoro solid paraffin with moly for racing use as final product or as a base before applying fluorocarbon waxes FP4. Use for old abrasive dry snow with temperature from -25°C to -10°C. Air humidity from 50% to 90%. Excellent during a long period without snow falling and with dirty snow. This paraffin can be also used as a moly hardener for HP3 VIOLET and HP3 RED in case of old, abrasive, windy and dirty snow, both natural and artificial. Use hot application with the waxing iron at 150°/160°C.

HP3
HIGH FLUORINATED PARAFFIN

HP3 VIOLET

CODE: MW0902N - 50 gr
CODE: MW0912N - 250 gr
CODE: MW0922N - 1 kg

USE SNOW TEMP: -12° / -6° C
HUMIDITY: 60 / 100%
APPLICATION: 140° / 150 °C E

High fluoro solid paraffin for racing use as final product or as a base before applying fluorocarbon waxes FP4. Use for all type of snow with temperature from -12°C to -6°C. Air humidity from 60% to 100%. In case of new or conserved abrasive snow and artificial snow, mix HP3 VIOLET with HP3 GREEN or LP2 GREEN if the humidity is lower. Use hot application with the waxing iron at 140°/150°C.

HP3
HIGH FLUORINATED PARAFFIN

HP3 RED

CODE: MW0903N - 50 gr
CODE: MW0913N - 250 gr
CODE: MW0923N - 1 kg

USE SNOW TEMP: -7° / -3° C
HUMIDITY: 60 / 100%
APPLICATION: 130° / 140 °C E

High fluoro solid paraffin for racing use as final product or as a base before applying fluorocarbon waxes FP4. Use for all type of snow with temperature from -7°C to -3°C. Air humidity from 60% to 100%. In case of new or conserved abrasive snow, artificial snow and springtime icy snow, mix HP3 RED with HP3 GREEN or LP2 GREEN if the humidity is lower. Use hot application with the waxing iron at 130°/140°C.

HP3
HIGH FLUORINATED PARAFFIN

HP3 YELLOW 1

CODE: MW0904N - 50 gr
CODE: MW0914N - 250 gr
CODE: MW0924N - 1 kg

PRODUCTS

USE

SNOW TEMP: -4° / 0° C
HUMIDITY: 60 / 100%
APPLICATION: 110° / 120 °C ☺

High fluoro solid paraffin for racing use as final product or as a base before applying fluorocarbon waxes FP4. Use for new moist not wet snow with temperature from -4°C to 0°C. Air humidity from 60% to 100%. Is the only choice with polish and sticky snow. Use hot application with the waxing iron at 110°/120°C.

HP3

RACING
 BASE PARAFFIN
ARCTIC BASE
 CODE: MW1000 - POWDER - 100 gr
 CODE: MW0810 - 250 gr
 CODE: MW0820 - 1 kg

USE
 SNOW TEMP: -30° / -10° C
 APPLICATION: 160 °C ☺

Powder and solid paraffin for training use and racing. Use for new, fine, abrasive snow with temperature from -30°C to -10°C. In case of very abrasive old icy snow (spring snow and glacier snow), this paraffin can be used over the fluorocarbon waxes FP4 to increase their long lasting. The final result will be a lower hydrophobia. It can also be used as universal hardener to protect the polyethylene base along the steel edges foils in case of natural or artificial very abrasive snow. Use hot application with the waxing iron at 160°C.

PRODUCTS

TOOLS AND AC CE SOR IES

NEW MAPLUSTEX ROLLERS

Who has never struggled to speed up skis after grinding them?
Or to remedy damages due to very abrasive and coarse snow or too high iron temperature?
For solving all these situations you must choose new MaplusTex rollers.

Thanks to their open, three-dimensional structure of special synthetic fibres, they allow:

- to speed up ski sole and to eliminate microhairs after a new structuring with grinding machine;
- to remove from ski sole the opacity following the use of a waxing iron utilized at too high temperatures;
- to eliminate micro-waves created when sliding on very abrasive or icy snow;
- to remove residues of a very hard wax (as Maplus Artic Base solid).

BASE

MAPLUS
GENERAL CATALOG 2020/21

**TOOLS
AND ACCESSORIES**
MAPLUSTEX FINE

CODE: MTO090RS
LENGHT : 10 cm - DIAMETER 11 cm

Thanks to its abrasive microlamine, it allows to speed up ski sole in really short time – just three passages are recommended – after new structuring with grinding machine. It also rejuvenates ski sole from opacity due to very abrasive or icy snow or after using an overtemperated waxing iron.

**TOOLS
AND ACCESSORIES**
MAPLUSTEX EXTRA FINE

CODE: MTO095RS
LENGHT : 10 cm - DIAMETER 11 cm

Thanks to its special fibres, it is recommended for removing microhairs from nordic skis after new structuring or grinding up. It also gives the final touch to the skis speeding up done with MaplusTex Fine: three passages after using MaplusTex Fine guarantee the best final results. Specially indicated for removing residues of a very hard solid wax, as Maplus Artic Base solid.

HOW TO USE TIPS

- having a larger diameter than normal rotating brushes, they must be used with minimum pressure at a maximum drill speed of 700/800 revolutions per minute (rpm);
- it is preferable to use them before preparing the edges, in order to avoid rounding off the cusps;
- after using MaplusTex rollers it is recommended to thoroughly clean the base with a specific liquid cleaner, as Maplus Clean, so to remove any residues.

POLYESTER & MERINO WOOL ROTO SET CM 20
 CODE: MTO087N

Polyester and Merino wool rollers especially recommended for hot or cold application of every FP4 perfluorinated waxes (powder, spray or solid).

Instead of roto-cork and traditional horsehair and nylon brushes, use new rollers of polyester and merino wool as follows:

1. Roll the base surface with the roto-polyester in both directions at a speed between 1000 and 1500 rpm according to the pressure applied. Repeat several times until the complete saturation of the base surface. Wait at least 10 minutes for cooling of the base surface and for the ski wax to harden.

2. Free the base structure with the 5 mm. roto-wool.

3. Polish the base structure with the 12 mm. roto-wool.

For top performances is necessary one set of new rollers for every type of product (cold-med-hot).

CODE: ML0530 - 80 mm

Made of premium steel, this is the only ski file with two different cuts: a coarse cut on one side to provide an high and frank bite, and a medium cut on the other side to provide a fine tune on edge sharpening. Now with the same file it is possible to remove the excess of sidewall material, to sharpen damage edges and to refine edge sharpening with high precision. Its dimensions are adapted to most sharpeners of 80mm in length. With this combination, sharpening it is not only faster but also much more easy: every skis or snowboard will have a precise and powerful bite.

Maflon s.p.a. is the italian leading company into processing high quality fluorchemical products matching the environmental sustainability.

The R&D department produces constantly new formulations of fluorinated polymers to realize appropriate and durable coating solutions for any kind of surface so to create a highly effective protective barrier against different agents as oils, water, food and beverages.

In order to get these results we respect the most advanced rules in term of sustainable development taking the best care of human being.

Recently we have developed a line of eco-compatible active substances, soluble in water-base, so to obtain more and more environment friendly products maintaining excellent characteristics of hydro and oil repellency.

CLOTHING SUPER CARE

CODE: MI0001
6 x 250 ml - Display Box

Super waterproofing spray polymer for high technology functional clothing.

- Special for all membrane textiles (e.g. GORE-TEX®), natural and synthetic clothing included elastic functional textiles. Extremely versatile.
- It guarantees the best impregnation maintaining the original breathability.
- It creates a highly effective protective barrier guaranteeing the best results in term of oil and hydro repellency and anti-stain properties.
- Easy and quick to use

TEXTILE SUPER CARE

CODE: MI0005
6 x 250 ml - Display Box

Super waterproofing spray polymer for high technology fabric of tents, backpacks, bags, gloves, and umbrellas.

- Special for all natural and synthetic functional textiles and membrane textiles (e.g. GORE-TEX®). Extremely versatile.
- It guarantees the best impregnation maintaining the original breathability.
- It creates a highly effective protective barrier guaranteeing the best results in term of oil and hydro repellency and anti-stain properties.
- Easy and quick to use

SHOES & GLOVES SUPER CARE

CODE: MI0010
6 x 250 ml - Display Box

Super waterproofing spray polymer for high technology outdoor and mountains shoes and gloves in leather or mixed fabrics.

- Special for all membrane textiles (e.g. GORE-TEX®), natural and synthetic functional textiles and leather. Extremely versatile.
- It guarantees the best impregnation maintaining the original breathability.
- It creates a highly effective protective barrier guaranteeing the best results in term of oil and hydro repellency and anti-stain properties.
- It nourishes the outer material conserving the original flexibility.
- Easy and quick to use

GOLF SHOES & GLOVES SUPER CARE

CODE: MI0015
6 x 250 ml - Display Box

Super waterproofing spray polymer for high technology golf shoes and gloves in leather or mixed fabrics.

- Special for all leather and natural and synthetic functional textiles. Extremely versatile.
- It guarantees the best impregnation maintaining the original breathability.
- It creates a highly effective protective barrier guaranteeing the best results in term of oil and hydro repellency and anti-stain properties.
- It nourishes the outer material conserving the original flexibility.

UNIVERSAL SANITIZING

CODE: MI0050 - 250 ml Spray
CODE: MI0051 - 5 lt - Liquid

Super effective and long-lasting sanitizing for helmets, boots, gloves and shoes.

- Extremely versatile for professional and leisure applications.
- It totally neutralizes unpleasant odors leaving a fresh neutral fragrance.
- Environment friendly it works with total absence of corrosive or irritating action.
- The regular use ensures long-lasting freshness
- Easy and quick to use

ECO CLOTHING SUPER CARE

CODE: MI0001
SIZE: 500 ml

Recently we have developed a line of eco-compatible active substances, soluble in water-base, so to obtain more and more environment friendly products maintaining excellent characteristics of hydro and oil repellency.

Maflon s.p.a. is fully involved in the LCPFCs (Long-chain perfluorinated chemicals) elimination process therefore all our products do not contain PFOA and related compounds.

From this very high level experience the Maplus Care Line was born guaranteeing the best results in term of maintaining the oil and hydro repellency and the anti-stain properties of the functional clothing, technical textiles and all kind of outdoor and mountain shoes conserving the correct and effective breathability.

Waterproofing spray polymer for high technology functional clothing

- Special for all membrane textiles (e.g. GORE-TEX®), natural and synthetic clothing included elastic functional textiles. Extremely versatile.
- It guarantees the best impregnation maintaining the original breathability.
- Special formula soluble in water-base. Environment friendly.
- It creates an effective protective barrier guaranteeing the best results in term of oil and hydro repellency and anti-stain properties.
- Environment friendly trigger spray without propellant gas
